

Pull out the stops to your Faith

Step 1 – Science, the point of creation

[Read Gen 1:1](#). God created everything. Read [John 1:1-3, 14](#). **Jesus, the First Born did the actual act of creation by his Word. Jesus and his Word is equal.**

When God created the universe He did it with speech. Read Gen 1:3. (In Hebrew according to [Strongs: Eloheem amar "hayah or"; hayah or](#)) **Everything was created by speech as described in the rest of Gen 1.**

When we were in school they taught us that all matter consists of atoms and that light consists of photons in waves. Our modern science relies much on the behaviour of [atoms](#). Matter (like your shirt) consists of atoms, which consist of protons, neutrons and electrons.

About 100 years ago they discovered that these in turn consist of [quantum particles](#). [Light](#) and all other forms of radiation, dark matter, anti-matter and all forces also consist of quantum particles. All quanta are electromagnetic in nature and they have categorized the different types with experiments. If all quanta are electromagnetic, then [everything that exists](#) is also based on the same, including the [spiritual realm](#) and spiritual beings. *(In the company of occultists it does come up that some have walked through walls and crawled up on windows – this is a manipulation of electromagnetic forces. Also, there are many studies about the "electric universe" as one link above will show.)*

Once you break down quantum particles you will end up with what they call [string theory](#). This was theorized 50 years ago and today they have different theories to describe different types of strings of 11 dimensions.

If it is true that everything consists of tiny strings, then it means that God released these strings at the moment that He spoke everything into existence in Genesis 1. **Unseen tiny vibrating strings created life. Speech is formed through creating vibrations.**

There is no air in space to form vibrational waves, so God created something that is vibrating in nature as speech.

Step 2 – Scientific limits

Did you know that when you take any length and keep on dividing it in half, that you have to stop somewhere? This is a minimum length, called the [Planck length](#). Likewise there is a minimum piece of time, called the [Planck time](#).

This means that the Universe has a limit to smallness and when God created the universe He created space and time as He spoke.

Step 3 – God's reality

God created time, He created everything, which means that **He is outside space and time**. Where God is, there is no space and time. This is how God can be everywhere and at any time. If you believe the Bible then read the following scriptures: Job 34:21, Psalm 139:7-10, Prov 15:4, Heb 4:13.

God is immortal and eternal, 1 Tim 1:17. Reading the Bible it is not difficult to figure out that there is no beginning and no end to God. He said He is the Alpha and the Omega (Hebrew Aleph and Tau).

What people do not always realize is that Jesus is always the same – from Gen 1 to Rev 22, in both Old and New Testament. Read Heb 13:8.

Jesus is God personified. Jesus appeared many times in the Old Testament. Examples are with [Adam](#), [Abraham](#), [Moses](#), and [Balaam](#)). If you read the dialogue between Moses and God and that of Jesus with the disciples it is easy to conclude that it is the same person.

God has never changed, his personality has never changed. His purpose and plans for mankind has never changed. He gave His Word! Everything in the bible is his Word. He thought about everything in the bible carefully before it was written down. **We can take Jesus on his Word.**

Step 4 – Understanding how this all relates to us

Jesus died on the cross so that we can be reconciled with Father God, so that we can live in eternity with Him. (John 3:16) He stated that He would live in us, that we can receive his Spirit. God who is eternal, outside of time fills us with Himself, who is beyond space and time. **This is how it is scientifically possible to live forever in the spirit after your body dies.**

We cannot see into the spiritual realm because there is a veil between our natural realm and the spiritual. God placed it there with the fall of Adam and Eve into sin.

You may not be aware, but today technologies exist where they tear the veil between the natural and the spiritual. All these technologies work on a quantum level, because this level is common between our realms.

The world has increasingly become evil. We can see how things deteriorate over time, how communities, governments, countries and churches have fallen away. Now with technology adding to open the doors to evil, to control people, we are reaching a point where the world will start to become hostile to peaceful living and to Christians.

They can also change the weather ([HAARP](#)), they can create space-time portals ([CERN](#)) and they can [manipulate people's brainwaves](#) and they mess around with DNA and combining humans with technology ([transhumanism](#)). *They change God's creation because of greed and control, not realizing that satan is behind all to destroy mankind.*

Jesus stated that in the End Times things will be like in the days of Noah before the Great Flood. (Mat 24:37) The world was so bad, that God had to destroy everything.

The antichrist will do miracles (Rev 13). The whole earth will be so deceived by that time, which the ordinary person will not be able to see things for what they are.

If Christianity is a relationship then communication is two-way. Jesus said his sheep know his voice. Read John 10:27.

Step 5 – Pull out all the stops

If your answer is yes, these last few words are for you: Pull out all the stops!

I Do not limit your Faith. Do not listen to other people telling you, that your spiritual experiences with God is nonsense. If you are in God's presence then you don't have to worry what others think. If God leads you to do unusual things while you are praying by yourself and for others, just do it. If God leads you to do and pray things you never heard of, then just do it. As the battles are getting worse you will need new spiritual weapons.

II Do not fall into traps. Avoid stuff that drag you down. Avoid people (company) that drag you down. Avoid places that drag you down. Why do you want to attend a bar, a drunken party or an unholy place just to please someone else. Avoid gossip and complaining, you must police yourself! Stop being disobedient and try your best to do things right. It cost you to build up your spirit, why break down your own hard work?

III Activate your Faith. You could only come to God through Faith in him. Eph 2:8, John 3:16 God has given you the authority to do, to act and to take charge. 1 Pet 2:9 states clearly that you are a royal priesthood. You were given the authority to rule and to lead others. *(Mention again portions of the previous parts of the message and scriptures)*

IV Speak Life, Speak with faith, declare things as if they were. The entire universe and all the information that exists was created through speech. Read John 14:12-13. Jesus said that we can do greater things than He did. If God is in us and He is the same forever, then it means that we also create when we speak by his power.

When Jesus spoke and released tiny strings so do we if we speak life. *(demonstrate)*

I believe that you, with the Holy Spirit in your heart also releases life giving strings when you speak according to the bible. (If God is always the same and outside time, you praying his will is the same as He speaking it himself.) These words can manifest as power, as healing, as miracles. You and I are only limited by our faith. So, stretch your faith even if it scares you. God will let you grow – go for it!

Read Prov 18:21 – you have a tool that can create life and death. ([Dr. Masaru Emoto](#) proved this with rice and water scientifically.)

When you pray, do intercession, take charge and be bold. *Example: Other examples were used in the sermon. When I recently prayed for the violence at the local university, I was wondering what I could do. What method can I use to even just start to pray? God helped me and reminded me of something. What can I do to change this? The answer is intercession, to declare boldly. Secondly, what did I want to see happen, or what do I want as the situation to be instead? Then I declared this. The Holy Spirit reminded me of scriptures to quote during my intercession, because the Word is Law in the Universe.*

We need to practise to be bold. We need to remember that the world is changing for the worse and we cannot lack behind. We need to remember we are in a battle and we constantly need to keep on growing and to become stronger. We need to remember that we need to protect and guide others too.

Pull out all the stops!

These are notes and not the verbatim speech, which had differences. These notes are for you the reader to understand the message. Regarding the facts mentioned here, I included links to encourage you to do your own study and come to conclusions by yourself in the presence of God. Do not discard new information just because your current environment tells you otherwise. Investigate and grow.
